INDEX TO VOLUME 36

Absorption, The, of staphylococcus bacteriophages by enterococci..... 155
Acetobacter, Some effects of association and competition on..... 357
Action, The, of soil microörganisms on the carbohydrates of pneumococci of types I–XXXII. Abstract..... 219
Activity, The, of *Azotobacter* organisms under field conditions. Abstract... 304
Adaptive bacterial enzymes: the mechanism of their production and their application in biochemistry and immunology. Abstract..... 257
Adsorption of poliomyelitis virus by cholesterol, ergosterol, and other sterol products. Abstract..... 218
Advantages, The, of tungsten wire for streaking-needles. Abstract..... 267
Aerobacillus species, Characteristic potentials of cultures of. Bacterial oxidation-reduction studies. III..... 633
Aerobacter indologenes, Influence of pH on the dissimilation of glucose by.... 67
Air in the autoclave, Studies on steam sterilization and the effects of..... 639
——, Microbiology of the upper. III. An improved apparatus and technique for upper air investigations..... 175
——, upper, An improved apparatus and technique for, investigations. Microbiology of the upper air. III..... 175
Allen, Ethel K. and Allen, O. N. Strain variation and host specificity of *Rhizobium* within the cowpea cross-inoculation group. Abstract..... 305
—— and ——. A cytological and histological study of the root-nodules of the peanut (*Arachis hypogaea L.*). Abstract..... 305
Allen, J. H. and Wood, M. A. Conjunctivitis. A study of the etiology of 622 consecutive cases. Abstract..... 653
Allen, O. N. and Allen, Ethel K. A cytological and histological study of the root-nodules of the peanut (*Arachis hypogaea L.*). Abstract..... 305
—— and ——. Strain variation and host specificity of *Rhizobium* within the cowpea cross-inoculation group. Abstract..... 305
Allergic skin tests for *Brucella* infection. Abstract..... 668
Allison, James B., Anderson, John A. and Cole, William H. The method of electrical conductivity in studies on bacterial metabolism..... 571
Almon, Lois and Stovall, W. D. The lack of one of the somatic antigens of typhoid cultures. Abstract..... 665
Alpert, S., Hitchner, E. R. and Donagan, E. A. A comparison of the biological activities of certain slow lactose-fermenting bacteria and of rapidly fermenting strains derived from them. Abstract..... 260
Amino acid requirements of the lactic acid bacteria. Abstract..... 655
Amylase, The, and phosphatase tests in relation to the commercial pasteurization of milk. Abstract..... 670
Anaphylactic shock prevented by ketenizing serum. Abstract..... 217

Andersen, A. A., Wood, H. G. and Werkman, C. H. Amino acid requirements of the lactic acid bacteria. Abstract 655
——, —— and ——. Nutrition of the propionic acid bacteria 201
Anderson, John A., Allison, James B. and Cole, William H. The method of electrical conductivity in studies on bacterial metabolism 571
Anderson, D. Q. and ZoBell, Claude E. Observations on marine anaerobes in oval tubes. Abstract 253
Antagonistic, The, action of *Bacillus thermophilus*, *Bacillus subtilis*, *Escherichia coli-communis*, and *Alcaligenes fecalis* on *Sarcina lutea*. Abstract 659
Antigenic differences in strains of epidemic influenza virus. Abstract 284
Antigenicity of strepto-fibrinolysin for rhesus monkeys. Abstract 272
Apparent, The, oxidation-reduction potentials of bright platinum electrodes in synthetic media cultures of bacteria 337
Arnold, C. R. A technique for staining and counting yeast spores. Abstract 655
Asheshov, Igor N. A simple method for the sterile filtration of small amounts of fluid 197
Attempt to secure fermenting variants by serial transfers in sucrose. Abstract 107
Atypical gram-negative organisms from cases of acute intestinal disorders. Abstract 283
Ayers, R. A. and Martin, W. P. Distribution and activity of *Azotobacter* organisms in Arizona soils. Abstract 303

B. alvei, A cinematographic analysis of the motion of colonies of 419
Bacteria, acid-fast, The classification of. II 39
——, Bound water content of vegetative and spore forms of 99
——, Flagella staining as a routine test for 517
——, Gelatin as a source of growth-promoting substances for 57
——, Heat sterilized reducing sugars and their effects on the thermal resistance of 369
——, intestinal, The fermentation of mucic acid by some 53
——, Nitrogen availability as an aid in the differentiation of, in the coli-aerogenes group 587
——, The apparent oxidation-reduction potentials of bright platinum electrodes in synthetic media cultures of 337
——, The effect of sublethal doses of monochromatic ultra-violet radiation on the growth properties of 17
——, The peptidases of. The proteolytic enzymes of bacteria. II 521
——, The proteolytic enzymes of. II. The peptidases of some common bacteria 521
Bacterial metabolism, The method of electrical conductivity in studies on 571
—— oxidation-reduction studies. I. Differentiation of species of the spore-forming anaerobes by potentiometric technique 605
—— oxidation-reduction studies. II. Differentiation of lactobacilli of diverse origin 621
—— oxidation-reduction studies. III. Characteristic potentials of cultures of *Aerobacillus* species 633

Bacterial spores, Sensitizing, to heat by exposing them to ultraviolet light 455
Bactericidal activity of "royal jelly" of the honey bee. Abstract 324
——, The, effect of sulfanilamide upon beta hemolytic streptococci in vitro 481
Bacteriostatic, The, action of sulfanilamide upon hemolytic streptococci of human origin. Abstract 669
Baker, E. E. and Mrak, E. M. Yeasts associated with the "sugaring" of dried prunes and figs. Abstract 317
Baker, Muriel, Stuart, C. A. and Griffin, A. M. Relationships of coliform organisms 391
Ball, Ernest. Heteroauxin and the growth of *Escherichia coli* 559
Balls, A. K. Recent observations on the enzymic hydrolysis of fats and other esters. Abstract 254
Bancroft, Huldah and Doull, James A. The trend of syphilis in Cleveland. Abstract 217
Barbour, G. M., Carpenter, C. M. and Hawley, P. L. The inactivation of gonococcal "toxin" in vitro by sulfanilamide. Abstract 280
Barker, H. A. The fermentation of definite nitrogenous compounds by members of the genus *Clostridium*. Abstract 322
Barron, E. S. Guzman and Jacobs, Henry R. Oxidations produced by hemolytic streptococci 433
Bauer, Henry and Gunderson, M. F. The effect of sulfanilamide on the streptococci in the udder of mastitis cows. Abstract 567
Baumgartner, J. G. Heat sterilized reducing sugars and their effects on the thermal resistance of bacteria 369
Beard, Paul J. and Gantvoort, W. F. Observations on supersonic vibration. Abstract 268
—— and Snow, Jane E. Studies on the flora of North Pacific salmon. Abstract 314
Beckwith, T. D. and Fish, C. H. Precursors to the formation of creatinine by bacteria. Abstract 452
—— and Geary, E. H. The effect of indol 3 acetic acid upon multiplication of *B. coli-communis* and *B. typhosus*. Abstract 453
Beckwith, T. D. and Morgan, H. R. Immunological relationships of polysaccharides of organisms of the *Eberthella-Salmonella* group. Abstract 270
——, Swanson, W. H. and Iiams, T. M. Foxing and deterioration of paper. Abstract 323
Bedill, Margaret and Lewis, Keith H. Factors facilitating the cultivation of non-sporulating anaerobic bacilli from the intestinal tract. Abstract 567
Beeson, P. B., Goodner, K., MacLeod, C. M. and Hoagland, C. L. Precise evaluation of therapeutic antipneumococcal sera. Abstract 276
——, MacLeod, Colin M., Goodner, K. and Hoagland, C. L. The use of the skin test with type-specific polysaccharides in controlling serum dosage in pneumococcal pneumonia. Abstract 275
Behavior of added hydrogen acceptors on the metabolism of *Aerobacter indologenes*. Abstract 657
Berger, Julius. The peptidases of bacteria. Abstract. (No abstract) 663
——, Johnson, Marvin J. and Peterson, W. H. The proteolytic enzymes of bacteria. II. The peptidases of some common bacteria 521

Berry, George Packer. A non-lethal "mutant" strain of *Virus myxomatosum* derived from fibroma virus. Abstract 285
—— and Morrow, Grant. The cultivation of *Neisseria gonorrhaeae* on the chorio-allantoic membrane of the chick embryo and the use of this technic for the study of sulfanilamide. Abstract 280
—— and Syverton, Jerome T. Multiple virus infection of individual host cells. Abstract. (No abstract) 671
——, Syverton, Jerome T. and Stiles, W. W. Epidemiological studies on Weil's disease, with notes on the susceptibility of the "gopher," *Citellus richardsonii* (Sabine) to the experimental inoculation of *Leptospira icterohemorrhagiae*. Abstract 279
Birkeland, Jorgen M. and Finkelstein, Robert. Studies on the mode of action of sulfanilamide. Abstract 215
—— and Steinhaus, Edward A. "Cannibalism" among bacteria. Abstract. 216
Bloor, Walter R., Hinton, Clara I. and Sandholzer, Leslie A. A study of the lipids of several strains of enteric bacilli. Abstract 670
Boisvert, Paul L. The grouping of hemolytic streptococci associated with disease in childhood. Abstract 333
Bond, G. The destination of nitrogen fixed within leguminous nodules. Abstract 664
Bond, V. S. Combination of mixed groups of *Rhizobium* in a single culture. Abstract 306
Bound water content of vegetative and spore forms of bacteria 99
Bower, Eleanor Cornell. A comparison of properties of toxic extracts of the *Eberthella-Salmonella* group. Abstract 334
Boyd, M. J. and Tamura, J. T. Anaphylactic shock prevented by ketenizing serum. Abstract 217
Bracken, A. F. and Greaves, J. E. The influence of cropping on the nitrogen-fixing capacities of the soil. Abstract 308
Breed, Robert S. and Peterson, Carl S. The organisms causing rusty spot in cheddar cheese. Abstract 667
Brewer, C. R. and Werkman, C. H. Dissimilation of citric acid by *Aerobacter indologenes*. Abstract 657
—— and ——. Dissimilation of citric acid by *Streptococcus paracitrovorus*. Abstract 261
Broadhurst, Jean and Paley, Charles. A differential stain for the direct examination of milk. Abstract 311
Broh-Kahn, R. H. and Snyder, Thomas L. The rôle of the "X" factor as a requirement for growth of *Hemophilus influenzae*. Abstract 216
Bronfenbrenner, J., Hershey, A. D. and Doubly, J. A. A manometric method for the evaluation of antiseptics. Abstract 107
——, —— and ——. Verification of the results secured by the manometric method of evaluation of germicides. Abstract 265
Brooks, R. F. Some cultural characteristics of the genus *Corynebacterium*. Abstract 665
Brown, J. H., Conn, H. J., Chairman; Victor Burke, Barnett Cohen, M. W. Jennison, J. A. Kennedy and A. J. Riker, Members. Report of the Committee on Bacteriological Technic: Progress during the first half of 1938. Abstract 244

Brown, R. W., Wood, H. G. and Werkman, C. H. Nutrient requirements of butyric acid-butyl alcohol bacteria. Abstract 246
Brucella agglutinins in horses. Abstract 668
Brumbaugh, Arthur S. The occurrence of yeast cells in a cardiac vegetation. Abstract 665
Burke, Victor, Conn, H. J., Chairman; J. H. Brown, Barnett Cohen, M. W. Jennison, J. A. Kennedy and A. J. Riker, Members. Report of the Committee on Bacteriological Technic: Progress during the first half of 1938. Abstract 244
Burlingame, Ella M. and Reddish, George F. A method for the bacteriologic testing of chemical solutions used for the "cold sterilization" of surgical instruments. Abstract 265
—— and ——. A suggested laboratory method for testing fungicides recommended for the treatment of epidermo-phytosis. Abstract 108
Burris, Robert H. and Thorne, D. W. Enzyme-systems in nodules of leguminous plants. Abstract 261
—— and ——. Respiratory enzymes of the root-nodule bacteria. Abstract. 262
Burton, J. C. and Erdman, L. W. Specificity studies in the so-called "E" group of leguminous plants. Abstract 664
Butyl, The, alcohol fermentation of wood sugar. Abstract 658

C. diphtheriae, A synthetic medium for the cultivation of 499
Calkins, H. E. and Czarnetzky, E. J. Some reactions of sulfanilamide with nucleoproteins and a suggested mechanism of the action of sulfanilamide. Abstract 330
"Cannibalism" among bacteria. Abstract 216
Carpenter, C. M., Barbour, G. M. and Hawley, P. L. The inactivation of gonococcal "toxin" in vitro by sulfanilamide. Abstract 280
Carpenter, Philip L. Heterogeneity of coliform bacteria as shown by the absorption of bacteriophage. Abstract 295
Carr, C. Jelleff, Dozois, K. Pierre and Krantz, John C., Jr. Sugar alcohols. XVII. The utilization of sorbitol, styracitol, sorbose, pinitol primulitol and hydroxypyruvic aldehyde by various microörganisms 599
Case, A, of acute bacterial endocarditis caused by *Escherichia coli*. Abstract. 660
Casper, Wolfgang A. Degeneration and variation of gonococci 111
Caulfield, W. J., Nelson, F. E. and Diamond, B. F. Studies on members of the *Escherichia-Aerobacter* group isolated from Kansas ice cream. Abstract 568
Cavell, Korine, Hoyt, Anson and Chaney, Albert L. Studies on steam sterilization and the effects of air in the autoclave 639
Central New York and Central Pennsylvania Branches, S. A. B. Proceedings. 665
Certain factors affecting the growth of yeast. Abstract 249
—— factors influencing nitrification and nitrate accumulation in soils under white pine forests. Abstract 320
—— newer aspects of the antigenic composition of hemolytic streptococci. Abstract 271
Chaney, Albert L., Hoyt, Anson and Cavell, Korine. Studies on steam sterilization and the effects of air in the autoclave 639

—— and Lee, Sylvan B. Nature of hydrogen inhibition of the symbiotic nitrogen fixation process. Abstract. 308
—— and Tam, R. K. A kinetic method for the study of bacterial dehydrogenases. Abstract. 663
—— and West, P. M. Growth-factor requirements of *Rhizobium trifolii*. Abstract. 306
—— and ——. Growth factors and nitrogen fixation by *Rhizobium trifolii*. Abstract. 654
—— and Wyss, Orville. Effect of environment on nitrogen excretion by leguminous plants. Abstract. 660
——. The presence and significance of oxalacetic acid in plant tissues. Abstract. 307

Wipf, Louise. Chromosome numbers in root nodules and root tips of certain leguminosae. Abstract 663
Wolfe, Gladys E. and Conn, H. J. Flagella staining as a routine test for bacteria 517
Wood, H. G., Andersen, A. A. and Werkman, C. H. Amino acid requirements of the lactic acid bacteria. Abstract 655
——, —— and ——. Nutrition of the propionic acid bacteria 201
——, Brown, R. W. and Werkman, C. H. Nutrient requirements of butyric acid-butyl alcohol bacteria. Abstract 246
—— and Werkman, C. H. The utilization of carbon dioxide by the propionic acid bacteria. Abstract 247
Wood, M. A. and Allen, J. H. Conjunctivitis. A study of the etiology of 622 consecutive cases. Abstract 653
Woolpert, Oram C., Gallagher, Fred W., Davis, Leona, and Hudson, N. Paul. Propagation of the human influenza virus in the guinea pig fetus. Abstract 218
Worley, Gordon and Getz, Horace. Destruction of bacteria by certain fish liver oils. Abstract. (No abstract) 658
Wyss, Orville and Wilson, P. W. Effect of environment on nitrogen excretion by leguminous plants. Abstract 660
—— and ——. The presence and significance of oxalacetic acid in plant tissues. Abstract 307

Yeast growth, Colchicine stimulation of, fails to reveal mitosis 187
Yeasts associated with the "sugaring" of dried prunes and figs. Abstract .. 317

ZoBell, Claude E. Studies on the occurrence and importance of bacteria in the sea. Abstract 662
—— and Anderson, D. Q. Observations on marine anaerobes in oval tubes. Abstract 253
—— and Feltham, Catharine B. The influence of temperature on the activities of marine bacteria. Abstract 452
